PROJECTS

Emergency Vehicle Priority System

HTML, CSS, JS/ Backend

- Developed a system to prioritise ambulances and fire trucks at intersections.
- Implemented Dijkstra's algorithm and hashing to compute shortest routes and control traffic signals.
- Built a web-based interface to visualise city map, routes, and real-time signal changes .

File Transfer System

Python, MySQL / Backend

- Built a secure file transfer system with AES encryption and decryption.
- Integrated user authentication with MySQL and real-time file transfer using sockets.
- Ensured end-to-end encryption, allowing only authorised receivers to access files. .

La-laam

TypeScript,, Vite, React / Frontend

- Designed and created a responsive e-commerce website for a women's clothing store (La'laam).
- Built product listing pages for suits, tops, and other apparel with modern UI/UX principles.
- Integrated smooth navigation, responsiveness, and deployment using Vercel for production hosting .

EDUCATION

Graphic Era Hill University

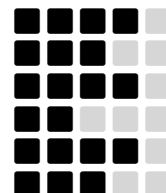

Undergraduate, Bachelor of Technology – CSE

Dehradun, India

07/2023 - 07/2027

TECHNICAL SKILLS

C++
Java
HTML/CSS/JS
React
C
SQL

SOFT SKILLS

Teamwork
Problem Solving
Adaptability

Misc.

- Certifications
 - Completed AWS SysOps Learning Plan
 - Participated in RoboMaster International Robotics Championship
 - Machine Learning ML - MOOCS
 - Google Cloud Computing Foundation - MOOCS
- Volunteering
 - Induction Program
 - Freshers
- Events
 - AWS JAM Event
